

SDG&E Artesian 230 kV Substation Expansion Project (A.16-08-010)
Energy Division Informal Data Request #3 Dated April 12, 2017 (via phone call)
SDG&E Response #2 (05/01/17)

Data Request Response for the SDG&E Artesian 230 Kilovolt Substation Expansion Project Application (A. 16-08-010)

REPORT OVERVIEW

On March 1, 2017 the CPUC deemed the application and PEA for the SDG&E Artesian 230 kV Substation Expansion Project complete. The Energy Division has required additional data to prepare a complete and adequate analysis of the potential environmental effects of the Project, in accordance with the requirements of CEQA. During a conference call between CPUC and SDG&E held on April 12, the CPUC identified additional data needs that are required for the CPUC to complete CEQA review.

SDG&E Artesian 230 kV Substation Expansion Project Application 16-08-010 Informal Data Request No. 3

Request No.	DATA REQUEST	SDG&E RESPONSE
<i>Project Description</i>		
1	Retention Basin: SDG&E to verify the expanded Retention Basin will not be paved.	<i>Response submitted previously.</i>
2	<p>Substation Site Plan: Create an Artesian Substation Site Plan figure that relates the site plan to the existing site and surrounding area. Preferably, the site plan should be transposed or plotted onto an aerial photograph background. This figure would utilize the same non-confidential shapes that are shown on the Site Plan provided as part of the DR1 response (Attachment ED01 – Q3).</p> <p><u>Clarification from April 28 email (Maria Hensel – ESA):</u> The Substation Site plan should clearly depict neighboring roadways, SDG&E property boundaries, the existing Artesian Substation boundary, the proposed expanded Artesian Substation boundary, and the proposed widened substation access road.</p>	<p>The requested graphic has been provided as Attachment IDR03 – Q2, Artesian Substation Site Plan (aerial).</p>

SDG&E Artesian 230 kV Substation Expansion Project (A.16-08-010)
Energy Division Informal Data Request #3 Dated April 12, 2017 (via phone call)
SDG&E Response #2 (05/01/17)

SDG&E Artesian 230 kV Substation Expansion Project Application 16-08-010 Informal Data Request No. 3		
Request No.	DATA REQUEST	SDG&E RESPONSE
3	Stormwater and Permit Clarifications: Is the substation site covered by an existing MS4 or other permit? Does it have an individual permit? If there are existing permit(s), can SDG&E provide the permit number to the CPUC?	<i>Response submitted previously.</i>
4	Blasting: The CPUC stated that based on information provided to date, the CPUC will have to draft mitigation that would cover potential blasting at any location along the Project alignment. Therefore, the CPUC requests that SDG&E identify only those areas that could require blasting, or alternatively identify areas where SDG&E is aware that no blasting would occur.	<i>Response submitted previously.</i>
5	Micropile Construction: SDG&E to review what is in the PEA and Response to DR1 concerning micropile construction. If information describing micropile construction is already included, SDG&E may provide the CPUC reference to that information. If such information is missing, SDG&E needs to provide a description of micropile construction to the CPUC for inclusion in the IS/MND.	<i>Response submitted previously.</i>
Noise		
5a	Micropile Construction: SDG&E to provide noise emission data for micropile construction.	<i>Response submitted previously.</i>
